

# Design + Construction Support

Service Area Overview

## Our team is committed to thriving in a way that promotes thriving.

Based on an ecological framework, our team leverages the power of the integrative design process to equip design teams with the right tools at the right time to empower the pursuit of zero-carbon, equitable, resilient, and healthy – or regenerative – built environments.

We provide a depth of experience and integrated services to support a wide variety of third-party certification systems, including all varieties of the LEED rating system, Sustainable SITES Initiative, WELL Building Standard, and the regenerative Living Building Challenge framework.

We work hard to center resilience and tailor our services to each project's specific needs, delivering cost-optimized, best-in-class services as necessary to achieve any project's performance goals.

**INTEGRATIVE DESIGN FACILITATION • BUILDING CERTIFICATION ADMINISTRATION • HEALTHY BUILDING CONSULTING**

**BUILDING ENERGY OPTIMIZATION AND COMMISSIONING • WHOLE BUILDING LIFE-CYCLE AND CARBON ANALYSIS**
